

DAHLBERG PLEASED WITH PROGRESS OF SUGAR COMPANY

With Business Associates He Inspects Properties At Canal Point, Clewiston

TELLS HIS STAFF TO GO AHEAD ON PROGRAM

Operations In All Stages Are Seen On Trip Through His Plantations

B. G. Dahlberg of Chicago, president of the Cleviston Company and the Southern Sugar Company, operating plantations and mills at Canal Point and Clewiston, visited and inspected the properties Saturday morning. He was accompanied by business associates. "Everything looks fine," Mr. Dahlberg said in Canal Point Monday afternoon. "We are going ahead with the program—and you know what that is."

Having inspected the operations at Clewiston, Mr. Dahlberg and his associates came to Canal Point Monday and spent the day looking over the properties. The inspection included a trip to the fields and to the camp in section 22 east of the site of the new mill, the several varieties of cane, the operations of clearing and grading the cutting of canals for seed and the planting, and looked at the drainage districts' pumping plants, some of which were running and others under construction.

Consultation was had with superintendents and foremen as well as with the executives of the organization.

It was after this inspection that Mr. Dahlberg told the editor of the Everglades News "Everything looks fine and we are going ahead with the program."

The program embracing the enlargement of the Clewiston mill from 1,500 tons of cane a day to 30 tons, the growing of 25,000 acres of sugar cane, the erection of a 6,000-ton mill at Canal Point and extension of the railroad tracks and the drainage systems. The expenditures for 1929 are under a \$5,000,000 budget with a like amount to be spent in this year in 1930.

Laying Boiler Brick At Clewiston Mill

CLEWISTON, Oct. 8.—With the exception of connecting the driving gear and kyming/milling, the 18-inch boiler of the Clewiston factory of the Southern Sugar Company is ready for the 1929-1930 grinding season. All indications point to the fact that the boiler will be finished on schedule for the opening of the 1929-30 grinding season.

Work is nearing completion on the brick work for the boilers and an army of workmen are putting finishing touches to the plant in preparation for its 1929 season of 4,000 tons of sugar cane a day.

New Day Is Dawning, Dahlberg Declares

DAYTONA BEACH, Oct. 7.—B. G. Dahlberg, president of the Southern Sugar Company, with headquarters at Clewiston and New York, has expressed himself as follows of the future of Florida, according to David Sholtz, president of the Florida State Chamber of Commerce. He felt that in spite of all the trying times experienced by Florida and Everglades business during the past few years there is a new day dawning for an industrial community in Florida. The state is bound to develop and end up as one of the most progressive states in the Union. If it does not vitally interested in Florida by put their shoulders to the wheel, this can be done.

The National Advisory Committee of Cane and Sugar in Florida is chairman and Mr. Dahlberg is chairman. He has declared the fact that big business leaders of the north, east and west are looking to the great possibilities presented by their Florida holdings. A recent conference held by the commission in New

Salt Water Effect On Homestead Soil

Dr. R. V. Allison, soils specialist at Everglades Experiment Station, took specimens of soils in Homestead district Monday and will examine them to learn the degree of salt water impregnation. The storm and tide blew salt water on farmed lands in Homestead district. Application was made to the University of Florida for expert opinion as to the harm done by Dr. Allison was assigned to make the investigation. Accompanied by E. R. Purvis, laboratory assistant, he went to Homestead, where an Assistant County Agent, Staff.

The service rendered by Everglades Experiment Station extends beyond the Everglades.

TELEGRAPH OFFICES AT GLADES TOWNS

Postal Company Starts Service at Pahokee, Belle Glade, Shavano

Offices of the Postal Telegraph Company were opened Monday at Pahokee and Belle Glade with telegraph and an office at Shavano. The Brown Company plantations, an automatic printing telegraph.

L. Baird of West Palm Beach is telegraph chairman of the Pahokee office. He said Wednesday a woman operator was to come to the office on the 15th.

The Western Union also has offices at Canal Point and Belle Glade.

An officer of the Postal company tendered the following announcement for publication:

New world-wide communications service will be offered the telegraph company. The company opens its office here next week. It will represent the first time Postal has had a Pahokee office. An office in Canal Point road, has been obtained and that building will soon be linked by Postal engineers to the growing of the world.

Selection of Pahokee as a point in the international network, wires, wireless and cable communication system, now represented by the Postal since the installation of the International Telegraph and Telephone System, is part of a national expansion program.

Executives and engineers are actively engaged today in carrying out this program. Thousands of new points have been added in recent months to the already existing network.

Many other offices, similar to the one in Pahokee have been opened by Postal this year by the convenience of customers and more are being added to the organization. The company is now conducting by district superintendents that new telegram outlets.

The vastness of the Postal system may be sensed when it is realized that engineers by installation of links at the Gold building have linked Pahokee directly and within minutes' time with distant points such as Shanghai, Buenos Aires, Rio de Janeiro, London, Honolulu and Manila, as well as to neighboring Florida towns and cities.

In addition to blanketing the United States, holds an exclusive contract with the Canadian Pacific Railway telegraph system. Companies in the same system include Commercial Cable Company, with seven offices in London, All America Cables, with three cables to Central and South America, and the Commercial Pacific Cables, which connects with Honolulu, San Francisco, Shanghai and the Far East.

Making 25 Machines For Cane Planting

CLEWISTON, Oct. 8.—In the Southern Sugar Company machine shop present activity is centering on the construction of 25 sugar cane planters to be used in the ambitious fall planting program. The planters, designed and built by N. C. Storey, will plant 20 acres a day and effect an enormous saving in both time and money in cane planting.

Work with a number of prominent business men of the country developed an expressed interest in the machine and there is prospect of a large advertisement. The official estimate is 1,000 acres and a probable yield of 30 to 35 hamper to the acre.

TRUCKERS START HEAVY PLANTING OF WATER CROP

Biggest Acreage Going In Along Road From Pahokee To Belle Glade

EVERY STAGE OF WORK CLEARING TO PLANTING

Drowning of Part of Fall Crop Not Regarded As Heavy Loss

Tractors pulling fertilizer distributors, beans being planted with Cole planters, plows breaking ground, land being cleared, laborers' shovels being built—the work of the fall water crop was observed Tuesday afternoon between Pahokee and Belle Glade. It showed that the planting of the water crop had started, the reference was made to the clearing of the land between the fall crop, most of which was lost in the September storm and the spring crop which planting does not start until after New Year.

Commercial chain, reported by the meeting of the Luncheon Club held in the Seminole dining room. The club is sponsoring the Canal Point-Pahokee Boy Scout movement.

There is ample material for a Boy Scout troop of 15 members, as large a troop as it is thought wise to undertake to organize at present, E. K. Kilpatrick, Jr., committee chairman, reported.

The meeting of the Luncheon Club held in the Seminole dining room. The club is sponsoring the Canal Point-Pahokee Boy Scout movement.

Commercial Agent Rogers of the Postal Telegraph & Cable Company, present, as a guest, told residents of this section can command the services of that organization.

No word has been received as to when the Rotary charter will be delivered but the members engaged in discussion of a program of entertainment. Appointment of a committee to plan the program was on word of the date of the instituting of the Rotary Club.

Representatives of the Rotary Club of Homestead to attend an inter-city meeting was received and accepted.

No meetings of the Luncheon Club were missed because of the storm but the storm did lessen the attendance at the meetings in the two weeks.

RAIOME MEAT ROTARY MEETING

Luncheon Club Represented At Inter-City Gathering At Homestead

An inter-city meeting of Rotary Clubs was held at Homestead Wednesday, and a delegation attended representing the Pahokee Business Men's Luncheon Club, which has applied for a charter from Rotary International and thereby was privileged to participate in the inter-city meeting. Other clubs represented were Miami, Hollywood and Fort Lauderdale.

The invitation to take part came from the Homestead Rotary Club, which is sponsoring the club at Pahokee.

The members of the Pahokee club who went to Homestead Wednesday were Howard Sharp, vice president; Marshall Hall, secretary; B. Elliott and S. W. Powell. The chief address at the Homestead meeting was made by Pat Ralphy of hardware Company, in which Marcus A. Milan, vice president of the business drainage district, is a partner.

Hamp Jordan, who owns the Pahokee club and there is a prospect of a large advertisement. The official estimate is 1,000 acres and a probable yield of 30 to 35 hamper to the acre.

PLANT FLOWERS, BEAUTIFY GLADES, AND LET'S ALL BE PROUD AND HAPPY

Let us get flowers planted this fall, on home grounds, on the streets and roads and in other public places—lots of flowers, to make our part of the Everglades a part of the "land of flowers."

Two or three years ago H. H. Hart had several large plots of flowers along a back road in between Belle Glade and South Bay, and the sight was so attractive that people drove out from West Palm Beach to see it. There are little of which plenty of bulbs can be had and the flowers are of different colors. They grow quickly and can be in bloom during the coming winter.

Several of the bridegrooms and focketers and pump house men have nice flower gardens or have planted gardens. This is commendable, and the practice should be encouraged and continued.

Professor H. L. Speer, the vocational agricultural teacher, will assist in procuring plants. Mrs. V. C. Denton is in touch with sources of supplies for landscaping. If teachers and officers of women's clubs will take up the subject, no doubt they can make available information of other sources of supplies.

Let's dress up the country in the next month and a half while the beans are coming on.

GOVERNOR TO BE BACK TO SEE CANE GRINDING

CLEWISTON, Oct. 7.—Governor Doyle E. Carlton is the first prominent Floridian to make plans for seeing the cane grinding at Clewiston this year.

On a visit to Clewiston while on the inspection tour of the Everglades drainage board, Governor Carlton will visit the 1,500-ton-a-day mill unit being built on the original site.

Advised that the Southern Sugar Company's stationery for the largest single-unit sugar cane factory in the continental United States, the governor said: "This is a wonderful thing for Florida, and I will be back in Clewiston when the grinding season starts."

RED CROSS ASKS US TO HELP OTHERS

Glades Residents Can Make Contribution Through Local Banks

On the basis of telegraphic information received from Mr. Robert E. Bondy, Disaster Chairman of the American Red Cross, an appeal is being made to the people of Palm Beach County to assist in the relief of approximately 1,500 families affected by the recent hurricane in Cuba, Mexico and Central America in Florida and Georgia.

It is estimated that approximately 1,500 families are in need of rehabilitation these families.

It is felt that Palm Beach County should contribute a quota of this amount, especially in view of the fact that when the hurricane struck, our people responded liberally to their relief.

Contributions will be received at any of the following places: Palm Beach county chapter, American Red Cross, Commercial Bank, West Palm Beach, Palm Beach, Florida; First National Bank of Palm Beach, Palm Beach, Florida; Bank of Pahokee, Pahokee, Florida; Bank of Canal Point, Canal Point, Florida.

One hundred and fifty acres of the 400 acres of fall tomatoes at Canal Mayaca, eight miles north of Canal Point, came through all the hurricane but will require the aid of 100 acres of peppers, Assistant Manager Gus Roell reported.

The heaviest losses on the loose new ground.

Carrots of seed potatoes from Maine is rolling, to be planted on arrival.

Lake Route O.K'd By Williamson's Effort

CLEWISTON, Oct. 7.—Resolutions to be presented to the Rivers and Harbors committee of Congress, relative to the construction of a large canal through Lake Okechobee from the ocean to the west, was passed at the convention of the Atlantic Deep Waterways Association held in New York City. It was announced by F. L. Williamson.

Mr. Williamson attended the session of the committee on New River, Okechobee and Calousa, and the personal tax done away with.

DO NOT HAVE TO GET PERMITS TO BURN THROUGH OCTOBER

Red Tape Is Cut By Board of Drainage District, Succeeding Fire Board

TERRITORY ALLOTTED EACH BOARD MEMBER

Regular Meetings Are Set For First Thursdays; Next At West Palm Beach

The red tape of permits to burn formerly required by Everglades fire control board was cut by the drainage district board meeting in Tallahassee last week, and all during October land owners and tenants are free to burn trash and clearing piles on their lands without permission written or otherwise from any one. This, however, does not do away with responsibility for exercising caution. Having met in Tallahassee this morning, the drainage board will hold its next meeting on Thursday, Oct. 17, at West Palm Beach, Nov. 7.

Each member of Everglades drainage board accepting assignment to inform himself of conditions in his territory, to report to his associates. Dr. W. H. Laird was interested in the manner in which studies are being made of the drainage system, of keeping muck soils in condition. The station produced recently a "muck" machine that cuts a opening under the ground surface. The device was originally made at the University of Florida, but used it at Lake Harbor. The muck was later used on Rex Beach's property.

Included in equipment recently is a machine that will register wind up to a velocity of 150 miles an hour.

DRAINAGE STUDIED AT TEST STATION

Board Member Visits College of Agriculture's Farm Near Belle Glade

The station produced recently a "muck" machine that cuts a opening under the ground surface. The device was originally made at the University of Florida, but used it at Lake Harbor. The muck was later used on Rex Beach's property.

Included in equipment recently is a machine that will register wind up to a velocity of 150 miles an hour.

As has been widely advertised in the state, automobile owners will soon apply for 1930 taxes. The law has always been in effect, but it has never been made enforceable.

In the past a very small minority have been paying personal taxes, and the state, as a result, losing much money, when according to a law already enacted, was due it. Those who have paid these taxes have been made to shoulder the burden for the tax dodgers.

The new enforcement measure does away with this danger, and will not only tend to increase state revenue, but will equate the individual taxes, as well.

Due to the fact that the present automobile rollover tax is completed before the new amendment came into effect, no separate assessment of the new measure is necessary. It will nevertheless be necessary to show that the tax is being paid. If it is not, it will be assessed. The tax will be assessed January 1. It will be necessary to pay the tax in the next regular election. Governor Doyle E. Carlton, under whose administration the measure was adopted, has declared in discussing the rule that in his opinion the measure should be included in the tag tax, and the personal tax done away with.

SIX EXPERTS COME TO PROVE VALUE OF EVERGLADES SOILS

Commission Is Appointed At Request of Rivers-Harbor Chairman Dempsey

RELATES TO PROJECT FOR FLOOD CONTROL

Due In Everglades Oct. 20; No Secret But Publicity Is Not Wanted

Six men of high position in the United States Department of Agriculture, composing a commission appointed by Arthur M. Hyde, chief of the Department, are due to visit the upper Everglades and Lake Okechobee region this week.

The purpose of their visit is related to the project for Federal cooperation in navigation and flood control.

They will report their opinion as to whether or not the Everglades is worth reclaiming, whether the land when drained will produce crops of its value and quantity justifying the expenditures made and proposed to be made.

The commission was appointed at the request of Chairman Dempsey of the Rivers and Harbors committee of the House of Representatives of Congress, who wanted authoritative statement of the information of the committee to which will be referred any bill relating to the widening and deepening of canals of Everglades drainage district under the direction of the Department.

Members of the commission visited the Everglades in June. At that time they were made to make a record of their presence at that time or the purpose of their visit, there was no public announcement of their departure from Washington or their arrival in the Everglades.

For the visit the commission is to make to the Everglades, the most public is the Department of Agriculture men who are under circumstances that will preclude suspicion that they are influenced by anything except facts of scientific accuracy.

Bills calling for appropriations for navigation and flood control in south Florida were introduced in the House of Representatives last year and hearings were held on the bills. Rumors came from the Department of Agriculture that the commission from the Department of Agriculture is for the purpose of getting the facts of the questions that were brought up last year.

Professor McCall is the chairman of the Department of Agriculture commission; another member is the Mr. McCrory who was a member of the Everglades engineering board of review appointed by the then Governor Martin. Each of the other members of the commission are men eminent in their specialty.

J. C. PHIPPS COMING

J. C. Phipps, head of the Mayaca Company, operating at Port Mayaca, is expected to visit the project on the north of Canal Point the latter part of this month.

THE AUTOMOBILE PERSONAL TAX

As has been widely advertised in the state, automobile owners will soon apply for 1930 taxes. The law has always been in effect, but it has never been made enforceable.

In the past a very small minority have been paying personal taxes, and the state, as a result, losing much money, when according to a law already enacted, was due it. Those who have paid these taxes have been made to shoulder the burden for the tax dodgers.

The new enforcement measure does away with this danger, and will not only tend to increase state revenue, but will equate the individual taxes, as well.

Due to the fact that the present automobile rollover tax is completed before the new amendment came into effect, no separate assessment of the new measure is necessary. It will nevertheless be necessary to show that the tax is being paid. If it is not, it will be assessed. The tax will be assessed January 1. It will be necessary to pay the tax in the next regular election. Governor Doyle E. Carlton, under whose administration the measure was adopted, has declared in discussing the rule that in his opinion the measure should be included in the tag tax, and the personal tax done away with.

Approve News' Views Dike To Stop Fears

Agreement and approval are expressed in many quarters with an article in The Everglades News last week that gave estimate of the loss caused in the upper Everglades by the fear of the lake overflow when warnings were sent out that a storm was approaching.

The Everglades News estimated that \$200,000 was lost in the expense of the trips of 32,500 people who fled from their homes and in the loss of productive labor of the workers who were away from their jobs and places of business for several days.

The Palm Beach Post printed in its editorial column Monday The Everglades News article and seemingly approved the statement that the Okechobee Flood Control District should at once undertake to finance the construction of a lakemore dike of moderate height.

the factors—soil, moisture and organization—into harmonious relation.

Jules M. Burguières, a former Louisiana sugar man, now vice president of the Southern Sugar Company, used to say, "There are no problems in the Everglades—there are merely conditions to be dealt with," and I think that stated the situation precisely.

The conditions in the Everglades, so far as the present sugar enterprise is concerned, are being dealt with by experts, and experts

Sugar is something for which there is no satisfactory substitute and which the human race will not give up. There is nothing that serves as sugar does that can be produced as cheaply. Sugar, then, is a staple that an investor can safely put his money into, acknowledging that the sugar industry will have its ups and downs but that in the long run it will give him a bigger profit because

The Southern Sugar Company has good soil, excellent control of water to grow the cane, an organization of experts and an administration by men of experience and sound judgment—a combination more complete than was available to any former sugar producer in Florida, or, I dare say, in the world. This enterprise must be financed, because its program calls for tens of millions of dollars, that is more money than any one man is likely to have in his pants' pocket. That it will be fully financed and its program carried out I have no doubt.

The Southern Sugar Company has invested

ed many millions of dollars. around Cana Point, Pahokee, Belle Glade, South Bay and Clewiston. Mr. Dahlberg's undertaking was a factor in bringing about the extension of the Seaboard Air Line railroad in Florida, the sugar company operations are credited with influencing the extension of the Florida East Coast railroad around the south end of Lake Okeechobee, and it has financed drainage districts for the construction of canals and pumping plants for water control.

The erection of a large sugar mill at Cana Point is certain to bring about the building of a railroad between Pahokee and the Seaboard Air Line railroad at Indiantown, an

And yet I do not class myself as a "sugar booster," and I said in opening this article that I don't care particularly whether the sugar operations succeed or not. Sugar cane is only one of the several crops that can be produced with profit in the Everglades; and if at any time Mr. Dahlberg and his sugar company concluded to use their land and the drainage facilities and the organization for a purpose other than the culture of sugar cane, I would not object. If he and the

The capital that is being put into the clearing and planting of land and the construction of drainage works will not be lost, whatever happens, for in all the world there is no such combination as exists here: A temperature that just avoids the excess of the tropics with all of the merits of tropic temperature, a rainfall heavy but producing no more water than is controllable, soil that is made to produce heavily by the temperature and the controlled moisture, and stable govern-

FIRE NOTICE

The Board of Commissioners of the Glades Drainage District announces the annual fire burning in the Everglades National Park, from Oct. 9 to November 1st.

If on November 1st conditions favorable for burning exist, a permit may be extended for an additional 10 days.

The Board recommends that burning and clearing be completed as early as possible in the season to avoid saturated fields, buildings and other property that builders or owners run the risk of losing should there be fire protection.

The Board proposes to start burning with the fire force in the upper sections of the Glades on October 9th, and to continue burning in the lower sections of brush, weeds and heavy grass at a later date.

Record Distinction To Bank of Pahokee

When Dr. W. H. Lair of Pahokee went up to Tallahassee to attend a meeting of the board of commissioners of Everglades drainage district of which he is a member, he was introduced as president of the Bank of Pahokee, "oldest bank in Palm Beach county."

"I'm a farmer," Dr. Lair protested; "I am accepted as a farmer and I am accepted as a farmer."

Ernest Amos, state comptroller, ex officio state banking commissioner and member of the drainage district board as well, remarked that the June 1929 statement of the condition of the Bank of Pahokee showed it had more deposits in proportion to its capital than any bank in the state of Florida.

On that information from the comptroller it was agreed by Dr. Lair's associates that he not only was a banker but a good banker and that if he was as good a farmer as he is a good banker he is a mighty good farmer indeed.

NEW FORM OF BASE BALL
TO BE INTRODUCED HERE

When Jack Barrett of Canal Point and E. G. Kilpatrick of Pahokee met at Sebring as refugees from the storm they saw "diamond base ball" played as they took part in a game.

The game so interested them that Mr. Barrett had ordered balls and bats and they were required for a team, two short stops being used, and the ball is larger than the regulation ball.

It is quickly played, the game does not last as long as the standard base ball and because of the shorter play time it is usually played in the evenings. The game is often played in Florida.

MORE BEANS CONSUMED
Shipments of beans from Florida are increasing from year to year and as there is not a corresponding reduction in shipments from other districts the deficiency in Florida beans are being consumed.

In the winter of 1925-26 Florida shipped 585 cars of beans and in the year following this increased to 2,785 and in 1927-28 to 3,100 cars. The 1928-29 season 2,100 cars of beans were shipped, although the Everglades was not producing in the fall of 1928.

NO DUCKS IN PELICAN
There were no ducks in Pelican Lake when a Canal Point man went there Sunday to get a line on what the prospects were for hunting when the season opened. A few weeks ago many ducks were there. It is known that ducks have been shot out of season and it is believed this scared them away.

Official visit to Everglades lodge at Pahokee October 10 and 24. The lodge will hold meetings at this time, at which the regular work of the lodge will be done.

Harry Shepard, who has a position at Clewiston, spent the week end in Pahokee visiting relatives.

G. C. Enlow accompanied his brother and mother, Alfred Huskey, Jr. and Mrs. A. J. Huskey, to Daytona Beach, Fla., where they visited Mrs. S. I. Huskey. They returned Monday.

L. L. Wilder and family have moved into the cottage back of the Pahokee theater.

Red Simmons returned Thursday from a two months vacation in Waikiki, N. C. Mr. Simmons has just completed a business course and will resume his position with the Glades Lumber yard.

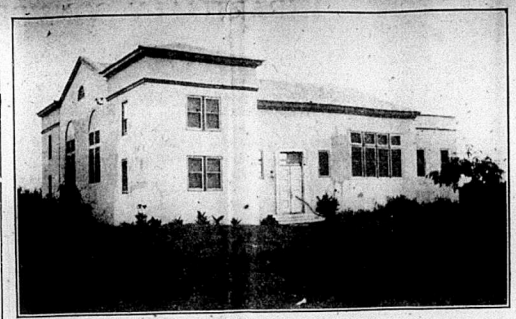

B. A. Williams, contractor, is building cottages in the field camp for the Southern Sugar Company east of Pahokee.

Ralph Stallions is erecting a house on his lake-front property in the field camp.

Miss Gladys Dowda has returned from Tallahassee where she visited Mr. and Mrs. Jessie Trim.

Mr. and Mrs. Ralph Stallions are occupying Frank Reniger's house in the absence.

GYMNASIUM OF PAHOKEE JUNIOR HIGH SCHOOL

News of the School As Told By Its Students

Editorial by George Cranford.
A Good Sport

Often in the school room and on the playground we hear some one speak of a "good sport." Just what do we mean by this term?

A good sport is an unselfish person who plays the game squarely, he wins or loses with a smile. He is manly and courteous to his opponents as well as his allies.

Not only can we tell a "good sport" when we see one on the athletic field but the same attributes carry along in other walks of life. A good sport is honest in his dealings with others, and always tries to do the right thing.

A good sport in the schoolroom studies his lessons, so when test time comes, he does his work fairly.

A good sport is courteous and considerate of others, therefore he is a gentleman.

COME ON, DANCE AGAIN IN PAHOKEE'S HALL

The Friday night dances in Acochee hall, over the Pahokee drug store, are attended by persons from all around the lake and when the dances were missed last Friday and the Friday before, there was a break in the pleasant routine of the community.

It is good news to everybody that the dances are to be resumed starting tonight (Friday). Paul Gray's orchestra will furnish music as usual.

Two Friday night dances were missed because of the storm warnings and the demonization that followed.

Start Them Early

NOTHING will help instill thrift into your youngsters more than to start them out with bank accounts of their own.

You will have to make the deposits at first—but get them interested!

Then as soon as they are old enough to earn a little money of their own, encourage them to put part of it in their savings accounts.

When they grow up they will appreciate the value of money, and realize the helpful influence of a bank book.

Bank of Canal Point

CANAL POINT

Lots of Water
Arlen Adams got back Monday evening from a trip to Tampa, where he took his wife to see a doctor. They had left Saturday evening, Arlen said Monday night that currents were strong in all streams between Lake Annie and Okeechobee and that Kissimmee river was getting wider.

Hugo In Coast Guard
"Having been 'raided' for his toll gate job, Hugo Bos has joined the Coast Guard. He split the latter part of last week and was in Canal Point in his uniform Sunday. He is rated as a cook."

Sugar Chemist Is Back
T. B. Gilbert, chemist for the sugar company, has returned from a vacation stay at Naplesville, Fla., his old home. He drove his Chevrolet car through and brought it back looking as new as when he left. Mr. Gilbert started "running" Monday—that is, making analyses.

Street Trees Thrive
The Australian pines that were set on the streets in the part of the town south of the canal are growing well—too well, think the persons who do not like Australian pines.

Lots of Thrills
Plenty of excitement this week, the villagers have remarked. Hurricane, football, world series baseball and then the price of cigarettes went up.

BARWICK TO CAROLINA
Henry Barwick, buyer for J. L. Brothers, New York left yesterday for South Carolina. Beans are being shipped from there and some will be ready here for two weeks or more.

FEDERAL INDICTMENTS
Many indictments charging violations of the liquor laws have been returned in the federal courts of both the Jacksonville and Miami districts. Two residents of Canal Point are on the list.

THIS IS THE STORE

It sells the tomato juice and kraut juice mentioned in The Everglades News. We try to have what our customers want. If we haven't got it we will get it.

Athletic Meeting

The Athletic Association of the Canal Point high school was organized Wednesday, Oct. 9. The following officers were elected: President, C. L. Wilder; vice president, Thos. Elliott; business manager and treasurer, Carolyn Mock; cheer leaders, Vernett Stuckey and T. A. Bass, Jr.

The various officers were received very enthusiastically by the entire student body and with each student's aid, the organization expects to have great success in the year's program.

The boys expect to start work on the ball court in the next few days, in order to get it in shape for practice as soon as possible.

The various classes of the Canal Point high school have elected their officers for the year as follows:

Senior class—Margaret Jones, president; Vera Todd, vice president; Elizabeth Love and T. A. Bass, Jr., entertainment committee; Miss Eva Holt, secretary; Carolyn Mock, treasurer; C. L. Wilder, secretary-treasurer; Miss Higgins, sponsor. Sophomore class—Vernett Stuckey, president; Oretta Thompson, secretary and treasurer; Carolyn Mock, secretary; Earl Pickren, secretary; Mr. Cox, sponsor.

The editor was feeling envious over a job press at the rate he was making impressions an hour when B. G. Dahlberg, president of the sugar company, called this week to see him at the high school campus.

Mr. Dahlberg is a general representative in the legislature, and the transition from press leader to statesman couldn't be made quickly enough for dignity, so the interested parties decided to count it a social call and let it go at that. Captain F. Deane Duff and P. L. Williamson and a couple of Mr. Dahlberg's northern business associates were in the party.

R. A. Richardson of Tallahassee, agent for the trustees of the internal improvement fund, and W. T. Wallis of West Palm Beach, head of the civil engineering firm, came in Monday in order that Mr. Wallis could have a copy of a new map of the upper Everglades in which he knew the editor would be interested.

Mr. and Mrs. J. C. Berry are staying at C. R. Weathering's for the present. He is to conduct the funeral home at Pahokee and Mrs. Weathering is his sister.

Mr. and Mrs. W. P. Jernigan, Jr., motored to Tampa, and attended the football game Sunday and spent Sunday with relatives in Haines City.

how many sentences she had used. "Ten," Mrs. Johnson, who was the "Get that" but twenty with the "Get that's."

Earl Pickren and Reeves Fritchey were fixing a fence. Earl asked Reeves what kind of tool he had used. "A hammer," Reeves said. "Holtstein."

Mr. Bishop in History during current events: "That report reminds me of the west coast man Harvey Firestone and his party one day."

Thomas A. Edison, Henry Ford and Harvey Firestone stopped at a filling station for some parts for their Ford.

"Mr. Ford: 'How about putting some Ford parts on my car?' I'm Firestone, the manufacturer."

"Filling station man: 'Yes sir.' Thomas Edison would you mind putting some Edison bulbs on the car please. I'm Thomas Edison, the inventor."

"S. man: 'Yes sir.' 'Harvey Firestone: 'How about putting some Firestone tires on it. I'm Firestone, the manufacturer.' F. S. man: 'Yes sir.'"

"Firestone's Tires who has a long white beard sticks his head out the window and was about to speak when the youth shouted: 'Now you tell me you are Santa Claus and I'll knock you on the head.'"

ABOUT PEOPLE

Dr. L. Longfield Smith, once connected with government agricultural school in Barbados, has been employed by the Sugar Company as agronomist and chemist and is stationed at Clewiston. Dr. Smith was a student at the Royal High School of Edinburgh and at Edinburgh University in Scotland. He was given a Ph.D. degree and was awarded the exhibition scholarship which took him to Leipzig, Germany, for research work in organic chemistry. He founded the agricultural experimental station at the Danish West Indies and directed this operation for 10 years. It was while acting in this capacity that he developed the cane S. C. 12-4 which has added millions of dollars to the sugar industry of Porto Rico and other West Indian islands.

Don P. Johnston has resigned as president of the Okeechobee county, having moved to Lake Forest, N. C. Henry Chamberlain was elected president of the council to succeed him.

The entire class has made more than a casual acquaintance with Higgins ink and drawing pens and paper this week. With laboratory work running daily, we expect to have a very profitable and practical course.

The girls' "gym" class has been organized under Miss Young, having two periods each week. Tuesday and Thursday.

Plans have been made for the new girls have entered school, and the outlook is bright for the athletic year.

The sewing laboratory has been changed into a gymnasium room for the girls. Each grade has charge of the care of the room for one week.

Miss Young placed a paper on the wall of the laboratory and asked all girls to sign who planned to do any part in athletics. Walton Briggs signed up. Why? Probably as a mascot.

The agricultural boys are making preparations to plant an acre each this year. Thomas A. Elliott and C. L. Wilder are going to plant an acre of beans. Earl Pickren is going to plant an acre of onions.

Mr. Speer and his agriculture boys are going to build a slat house this year better than the one they had year before last.

Jokes
Mr. Chaffer: "Margaret, will this problem work out right this way?"
Margaret: "No."
Mr. Chaffer: "Never in this world?"
Margaret: "Nor the next one either."
Mr. Chaffer: "No, I don't expect so. I guess they will be as truthful as they are down here."

Mr. Johnson was teaching a lesson during which she repeatedly asked the class, "Did you get it?"

Mr. Johnson was teaching a lesson during which she repeatedly asked the class, "Did you get it?"

Mr. Johnson was teaching a lesson during which she repeatedly asked the class, "Did you get it?"

They were sold to the Okeechobee Fish Company, W. J. Hendry, proprietor.—Okeechobee News.

M. E. CHURCH NOTES

Sunday school, 9:45 a. m.
Prayer services, 11 a. m. and 8 p. m.

Prayer meeting Wednesday 8 p. m. followed by a social hour.

The Ladies Aid met with Mrs. Hansen Tuesday afternoon.

Mrs. Hansen is chairman of the bazaar to be held early in December. She reported a number of articles already made and gave out hints to be made. Mrs. Bergen is again chairman of the Thanksgiving dinner committee. The usual chicken dinner will be given this year as has become the annual custom of the Aid society. The next meeting will be held with Mrs. Bergen October 22 at 2 p. m.

Everything is working along nicely. Prof. E. Messer has a singing class at the church.

The Tharp brothers of the Tharp music shop, Tampa, were with us from Monday noon to Thursday morning.

Preaching 11 a. m. and 8 p. m. We aim to have a different speaker each Sunday morning.

Mrs. W. J. Thomas and boys are still in safety Harbor. All are doing fine. No date is set for their return to Canal Point.

NOTICE OF APPLICATION FOR TAX DEED

Notice is hereby given, That D. M. Hilder, holder of Tax Certificate No. 11225, 4th day of July, A. D. 1927, has made application for tax deed to have declared in accordance with law. NEWS FROM AROUND THE BAY

SOUTH BAY

October 7.

By Mrs. G. J. Barstow.

The Farmers Cooperative Association will hold a meeting at the Legion Hall in Belle Glade Monday evening at 8 o'clock for the purpose of organizing and electing a board of directors. There will be an open discussion of policies to be pursued and every one is cordially invited to attend. The meeting will be held in the hall of the association which will be a paying concern right from the start; the proceeds at the end of the year to be divided into as many equal parts as there are shares outstanding and paid to the shareholders in the form of dividends at that time. A packing house site has already been secured on the railroad at the Belle Glade station. Mrs. Harry Mitchell was unable to attend her duties as head of the good deeds department of the C. C. Denton store Thursday on account of illness.

Mr. Gardner has purchased a Ford for the use of his family.

Mr. King and Mr. Lund were out last Friday to locate the site for the Belle Glade school and at the same time made an inspection of the South Bay drainage district. While here they discovered an owl in the building which Mr. King decided he wished to take home with him. Accompanying after some difficulty the little fellow was captured and taken home by Mr. King. Mr. Lund, local superintendent, stated that all carpenter work with the exception of the blackboards which are expected any day and the tiling was completed Thursday evening and the carpenters moved to Belle Glade Friday to start work there. The plumbing and plumbing also was completed this week. School is presently being held in the first of the six class rooms. Mr. Lund feels that the school board is to be commended highly on getting up such a fine and well constructed building and thinks they displayed considerable foresight in anticipating the growing needs of such a building in a community destined to develop as South Bay is within the immediate future.

A sidewalk to the new school building is expected to be completed with very little more delay. A number of South Bay citizens feel that there is a fine opening here for some enterprising citizen to set up a local ice route. It is felt that the Florida Power & Light Company would be pleased to build an ice house and deliver the ice provided someone cared to take over the route. The present arrangement of being supplied by the Belle Glade route is highly unsatisfactory in many ways as the service to any customer other than the ice delivery man is extremely poor. Besides this the rate delivered is 80 cents per 100 pounds while other neighboring city of Clewiston gets their ice delivered by the same company for 60 cents per 100 pounds. It is understood that the local delivery man makes this extra 20 cents per 100 as the rate made by the Florida Power & Light Company is the same to all deliveries. In addition to this a local route would give us better weight as the ice would not melt so much if supplied from a local ice house. With the town growing rapidly as it is and the custom of the sugar

ed to West Palm Beach Saturday for a pleasure trip.

In a recent issue of the Belle Glade weekly, we note that the citizens of that village seem greatly perturbed over the fact that South Bay has a high school while their school only has six grades and they go on to criticize the school board for showing favoritism in building the larger school in the smaller place. It is an excellent trait of any community to think well of itself and for that Belle Glade is to be commended. It is, however, soon becomes a matter of amusement to bystanders when one gets a very much exaggerated opinion of oneself. Perhaps there are some things about this situation that the worthy citizens of Belle Glade have overlooked. We do not pretend to say which town we have been much too busy with our affairs to take a census in each case, but a comparison of place attending school should give a very different idea.

The young people of South Bay moved to Clewiston Saturday evening to attend a party given by Jewel Lowe and Louise Waldron at the school house. All report having had a delightful time. Mrs. Wyse and Miss Plank were official chaperones.

The Miami-Belle, Edith and Alice Willis and Ruby and Julia Crocker were Sunday afternoon callers upon Miss Geraldine Harris.

Mrs. S. J. Fisher who has been visiting from some time in Miami, arrived here last Saturday accompanied by three little daughters, Margaret, Evelyn and Louise. Mr. Fisher, who has been spending the summer with his parents and brother in Des Moines, Iowa, is expected to leave the latter part of this month.

James Mather, resident engineer, reports that his new drainage ditch is now running on 24 hour shifts and pumping at the rate of 700,000 gallons per minute. They have plenty of fuel; are unloading one car now and have a second one being rolled into Lake Harbor over the A. C. L. And within the next few days there will be a 10,000-gallon tank at Belle Glade over the P. E. C. Engineer Mather states that the water in the canals is again almost back to normal level; but that they will continue pumping continuously until "the farmers tell them to stop." The lake level now stands at 14.2 and the water now running into the lake from the northwest via Fish Baiting creek and Kissimmee valley is expected to bring the level up to 16 feet before the close of the rainy season.

Carl Wolf, who with his brother, Carl, bought out the Turner-Grove interests on Krueger Island made an overnight visit at the home of G. J. Barstow Sunday. Mr. Wolf states that while the storm put them under water temporarily, his land was not so great an amount of damage as he had not as yet planted his sugarcane. His land was all ready to plant and the water if anything put it into better condition than before. He was not even necessary to start the pump as he cut a drainage ditch in his land. He estimates that he lost about thirty trees of two to three inches diameter. Approximately forty tangerine trees were overturned; but were immediately reset and will not suffer any great amount of damage. He saved his seed beds and his sugarcane. He is now ready to start farming operations on a big scale. Mr. Wolf and Mr. Barstow left early Monday morning for Miami where they had some business to transact.

The Willis young people motor-

Around The Lake

Clewiston post of the American Legion plans a celebration of Armistice day.

Pictures of incidents in the Miami Chamber of Commerce would tour will be printed in the Miami Herald of Sunday.

The Florida East Coast railway is preparing to put in additional freight work between its terminals in the Okeechobee city limits. A year ago high water washed under the tracks at this point and it also washed tracks of the S. A. L. railway across Taylor's creek at that point.

The Miami Chamber of Commerce probably will make another good-will trip through the Lake Okeechobee region. Dale James, the executive secretary, writes in a letter that records the appreciation of the chamber's members of the courtesies extended when they came last month.

Because of the heavy rains, pumps were run steadily in Eagle Bay drainage district last week to keep the water down and save most of the fall crops.

S. J. Fisher, superintendent for the South Bay-Belle Glade zone of the Southern Sugar Company, states that the filling of the drainage canals due to the heavy winds of last week did no harm to the growing cane and was an actual benefit as it provided needed moisture.

John S. Cottrell of Moore Haven sent an article over a column long in the current issue of the Glades County Democrat complaining about the administration of Dition Island drainage district. The article is printed as a paid advertisement. Mr. Cottrell was formerly one of the officers of the district. He also complained about the tax rate levied by the county commissioners.

There came a wagon from the Southern Sugar Company upon which he has mounted a small pump engine which he is pumping out the various small plots of land being used for experimental purposes to the main ditches to be carried off by the big pump. The Cornell Construction Company of Muscon, Ga., has moved its headquarters to South Bay while putting in the shoring for the Southern Sugar Company on section 12.

D. T. Walters and wife have returned to Fort Lauderdale and will stay there until late in the fall. Mr. Walters has moved his home in Belle Glade, having motored down from points in Michigan.

C. E. Riedel is still on his honeymoon in Chicago and other northern points.

WEST PALM BEACH

BELLE GLADE

October 5.

Hubert Watta of West Palm Beach was a recent visitor, coming to make an inspection of his houseboat.

Mrs. R. G. Fisher submitted to a major operation at a hospital in Des Moines, Iowa, on September 21, and is reported to be getting along well.

Arthur Stine of West Palm Beach made a trip to South Bay on V. C. Denton recently. W. H. Rawls has the night shift at the Hare Beach pumping plant. Mr. and Mrs. Orth Collins, accompanied by Mr. Collin's mother and three sisters, were visitors at the home of Mrs. V. C. Denton, driving from Fort Lauderdale.

James, Junior high school instructor, has moved his family into the Grogan home.

Mrs. C. Willis had his lawn dragged and rolled on Thursday preparatory to landscaping it.

Mrs. V. C. Denton received a letter from Mrs. John W. Drake, president of Palm Beach County Council of Parents and Teachers this week urging her to start the movement for a Palm Beach Teachers Association in South Bay without delay. Mrs. Denton has set the time for the first meeting at 9:30 o'clock Tuesday afternoon at the school house, as Mrs. Drake will be unable to be present at that time and help in organizing. All parents and friends of the school are cordially invited to attend the meeting and lend the movement their aid and support.

The Christian Endeavor held a special meeting at the Willis home Wednesday evening. A large number were present and the discussion of the sixth chapter of Matthew was spirited. The contest which is to terminate when one of the opposing sides was won 1,000 points now stands 333 points for the side captained by Fayell Sherman and 309 points for the side of Della Hawkins.

MOORE HAVEN SCHOOL

Two hundred and five pupils enrolled in the Glades county high school and grammar school at Moore Haven when the fall term opened last September.

With the exception of two, all teachers in the Moore Haven school are graduates of the University of Florida.

Prof. J. T. Holladay, the principal, taught at Waynesville, N. C., until 1917. His home is at Brunson, S. C., he is a graduate of the University of Georgia, S. C., and holds the A. B. degree.

Miss Annie Moore Clark, who will have charge of home economics.

recalled lost all the members of his family but one in the hurricane of a year ago, sustained some losses due to the storm this year as he had a big acreage of beans just about ready to pick which were inundated, his pepper crop was severely damaged, and his limas destroyed. He saved his pepper seed beds, however, and is ready to replant. Mr. Crossman, another Ritta Island owner, stood a big loss in beans. They are both optimistic regarding the coming season however, and state that they are not going to let a more storm put them down for the count," they said. Capt. Forbes returned and immediately started overhauling his boats and tractor ready to move to the island.

NOTICE OF APPLICATION FOR TAX DEED

Notice is hereby given, That D. M. Miller, holder of Tax Certificate No. 1224, dated July 4, 1927, has filed said certificate in my office and made application for tax deed to have the same confirmed. The following described property situated in Palm Beach County, Florida, is the subject of said certificate: Block 71, Unit 1, of the Florida Land and Water Co., Inc., as shown on the map of said county, in the 12th Range, 43rd East, Township 48 South, Range 43 East, Section 12, T. 48 S., R. 43 E., S. 12, containing 40 acres, more or less, and the said property under the said certificate issued in my office on July 4, 1927.

Unless said certificate shall be redeemed according to law, tax deed will be sold on the 12th day of November, 1928.

Dated this 20th day of September, 1928.

W. C. DENTON, Sheriff of Palm Beach County, Florida.

Filed for record, this 20th day of September, 1928.

W. C. DENTON, Sheriff of Palm Beach County, Florida.
